

The Field Operations Group operates, maintains, and repairs the water distribution and wastewater collection lines ensuring our customers and consumers receive uninterrupted, quality potable water and associated wastewater service.

This is accomplished by providing:

Emergency Response - provides critical support to MHWSC customers and consumers 24/7/365

Construction Function - offers in-house construction to improve service installation and restoration.

Preventative Maintenance Programs - ensures the integrity of water and wastewater infrastructure.

Leak Detection - ensures water leaks are identified and repaired, reducing water loss.

Sewer Line Cleaning - reduces potential for back-ups due to debris and grease.

Inspection Services - inspects pipeline and facilities construction in subdivision developments.
